

## KIEV MEDICAL UNIVERSITY UAFM

KMU aims at maintaining a reputation of teaching with a difference. The rare specialty of combining the basics of Folk medicine with conventional medicine makes our specialists have an edge over all other health professionals in the world. The University has been constantly working on combining principles of evidence based medicine and Practical based learning in the traditional European curriculum to give that added advantage to our students.

The University enjoys pardonable pride in being the only institute in Ukraine with a program that allows the student to have hands on practical training in the best private health care establishments in the country. KMU IS the only university in the country to have a unique practice of making its students undergo part time training in Germany or Poland.
